### **Beliefs and values behind Dance**

Bodily movement is an adaptive necessity as well as a human birthright. As humans, we move for many reasons. We move for pleasure, communal bonding, ritual, and self-expression. When movement is performed with awareness for its own sake, it becomes dance.

Dance is a basic form of human nature and also an individual and cultural expression. Dance can celebrate play, prayer, courtship, recreation, entertainment, and the human need to communicate the meaning of life in art. Dance can be a powerful artistic medium for communicating values and beliefs about the human experience.

Artistic dance is an understanding of the language of movement and to develop aesthetic knowledge and skill in movement expression.

Education in the art of dance provides students with deep, thought-provoking experiences that combine many art forms and disciplines. The art of dance is a full, enriching, and physically joyful experience.

Through dance a person learns teamwork, focus and improvisational skills. Dance awakens new perceptions in children which help them to learn and think in new ways. Children need to express and communicate their ideas and to be given the opportunity to make creative decisions even at a young age.
