Task 2

L-E: - THINK WINK DECIDE

BE WATER WISE

Did you know that every time you take shower or pour a glass of lemonade you are using the same water that the dinosaurs used? For millions of years, our water has recycled and cleansed. Today however because of pollution, pure water is seldom found in nature. This is because water is an excellent solvent-other

substances dissolve easily into it. This means that as water travels up into plants, it carries with it not only minerals and nutrient, but harmful dissolved chemicals that pollute the water and endanger plants, animals and people.

Read each statement carefully. Then add the change you would do to save our precious water resources by following wise ways

EVERY DROP COUNTS!

1- Use only as much water as needed. So I should

2- A deep bathtub can hold up to 26 gallons of water. So I should

3-A slowly dripping faucet can waste 3 gallons of water per day. So I should

4-Water used to wash vegetables and fruits must not be thrown. So I should

5-Water released from the RO machines waste up to 10 gallons of water per day. So I should

6-There are other reasons for using water wisely besides preventing water pollution. So I should
