## **Soil Conservation**

Soil Conservation is the prevention of loss of Top Layer of Soil from Erosion.

### **Ways to conserve soil:**

Our soil is very important when it comes to quality of life. It not only plays a role in how things grow but also in the air that we breathe. are methods that can protect and **conserve our**

our  
There  
**soil.**

### **1. Forest Protection:**

Protecting natural forest are the best way to protect soil erosion.

### **2. Fewer Concrete Surface:**

The soil requires and adequate amount of water in order to function properly. Lots of concrete surfaces, make it difficult for water to get into the soil which leads to soil erosion.

### **3. Terrace Planting:**

This type of planting is done in hilly areas to protect the soil from erosion when rain water flows naturally.

4. **Plant trees to secure top soil:**  
Simply planting trees is the best conservation method to save top soil.

5. **Crop Rotation:**

It is a process of growing different crops in same soil. This process helps in lack of fertility in the soil and works to conserve soil.

the

6. **Water the Soil:**

Watering soil along with plants and vegetables helps to nourish and protect soil.

**ART:**

ART

*Summative Assessment Task - With the help of your creativity and imagination skills, Create your own art piece with the help of clay or paper mache.*

*Criteria for assessment*
