

SANSKAR SCHOOL

GRADE-IV

Assignment 2

Date: Thursday, 8th October 2020

ENGLISH:

Articles: Do the exercises given on page 42 and 43 in the book.

MATHS:

Money

Solve the following questions in the notebook. (Page no. 164)

4. Rajeev bought a packet of cookies for ₹ 55.00 and a jar of mayonnaise for ₹ 75.50.
How much should he pay to the shopkeeper?
5. Vineet bought one book for ₹ 63.75 and another book for ₹ 45.50. What is the total cost of the books?
6. A pen costs ₹ 24. Find the cost of 5 such pens.

Exercise 12.2

1. Multiply.

a.

₹	P
78	50
×	12
□	

b.

₹	P
145	22
×	10
□	

c.

₹	P
242	25
×	17
□	

d.

₹	P
2314	75
×	23
□	

e.

₹	P
3425	55
×	35
□	

f.

₹	P
7634	50
×	67
□	

→ Tables Target of the week – Revise tables from 2 to 18

HINDI:

पाठ्य पुस्तक में पृष्ठ संख्या 31 -32 पर प्रदत्त कहानी 'तुषार की ईमानदारी' के प्रश्नोत्तर का कार्य अपनी कार्य पुस्तिका में करिए।

UOI:

TUNING IN

LOI 1- Various Civilizations of the Past

The history of humans' dates back millions of years into the past, back before humans could use language or tools or even make a fire.

Task: Let's explore the interesting life of early humans through the video and the reading material. Use the **Visible Thinking Routine- Connect-Extend-Challenge** to describe your findings about them.

Video: <https://youtu.be/8exHvk7mals>

Connect - Extend - Challenge		
 CONNECT How are the ideas and information presented connected to what I already know?	 EXTEND What new ideas did you get that extended or broadened your thinking in new directions?	 CHALLENGE What challenges or puzzles have come up in your mind from the ideas and information presented?
We already know	We have learned	We want to know

Adapted by Alice Vigors 2017

This routine helps learners make **connections between new ideas and prior knowledge, encourages them to recognize ongoing questions, puzzles, and difficulties as they reflect on what they are learning.*

(Reading Material)

EARLY HUMANS

In early days, human life was very hard. They spent their life in caves, wrap animal skin and tree leaves over their body and hunt animals for food. With time, they discovered many good things like fire, tools, farming etc. that made their life better than earlier. But these changes in early human's life had taken a very long time.

Life Style and Food of Early Humans

Early humans lived in jungle and were afraid of bigger and stronger wild animals. Earlier they had no house to live in and they spend their time on the trees or hide themselves behind the bushes. But it could provide them security from wild animals, rain, winter and sun heat. So, they started living in caves.

As food and clothes is the basic necessity of humans, they started wrapping tree leaves and animal skin over their body to protect themselves from cold and heat. But they needed food also to live. They do not know how to grow crops in fields and finding food was not easy. In search of food, they had to go from one place to another. Earlier, they used to eat fruits from tree or roots of plants. Then they started hunting animals for food.

Discovery of Tools

In start, early man started killing small animals for food. But they could not kill large animals with their bare hands. So, they used sharp edged stones to kill animals. Probably, this was the first tool he had started using for his need. They kept on improving their tools with time and requirements. They found that if they tied a sharp stone to a long piece of wood, they could throw it to a wild animal at a longer distance and they did not require go near to kill it. This was the invention of a spear. Later, on they improved it by making with bones and started using tools not only for hunting but also for cutting, digging and sewing.

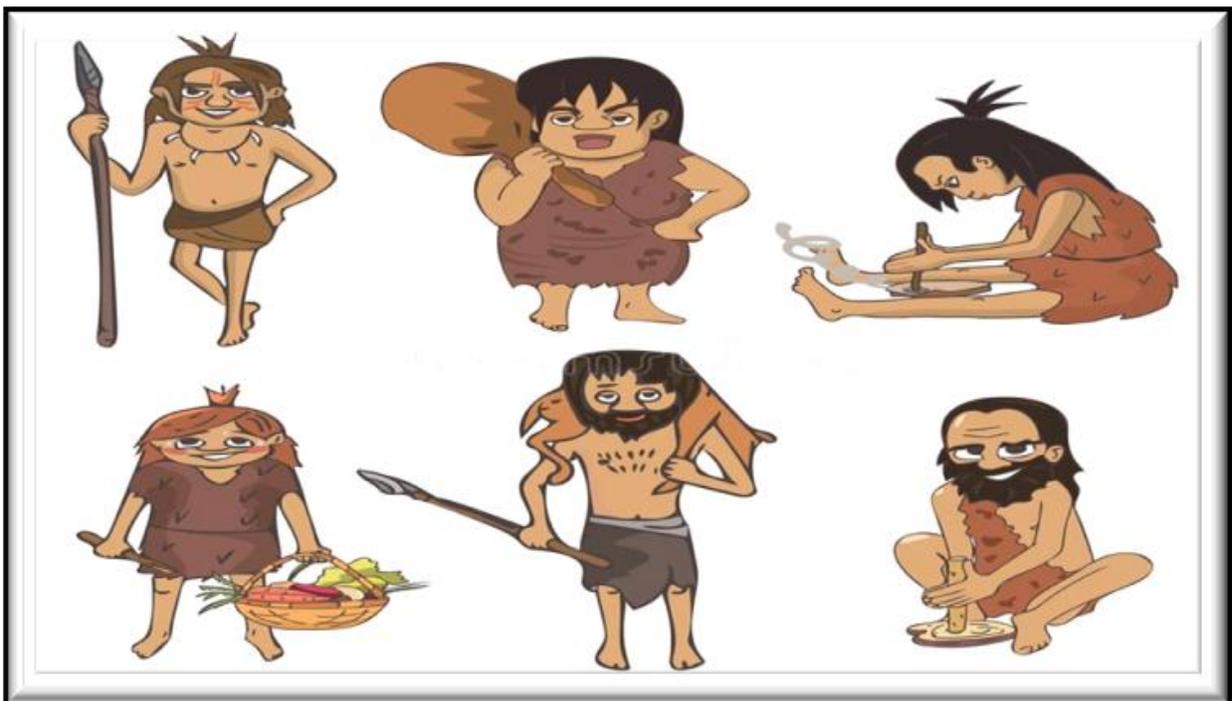

Discovery of Fire

Early humans ate raw flesh as they did not know how to cook their food. They had seen fire breakouts in jungle several times, but did not know how to make it and how they could use it. Rather, they were afraid of it like animals. With time, they felt that they could use it for keeping themselves warm in winter. But making fire was really a big problem. So, they decided to keep jungle fire burning and started adding dry grass or leaves to it. But it was not a permanent solution.

One day, they saw sparks coming out from falling stones which were rolling down from the hills and got an idea to make fire by rubbing two stones. This was really a great discovery as now they were able to make fire whenever required. With time, they learnt other uses of fire too. They found that they can light up their caves and protect their family from cold and wild animals using fire. They also came to know that the roasted food is much softer than raw one and also tastier to eat and this was the beginning of cooked food.

Discovery of Agriculture

Over the years, early humans noticed that when seeds fell in a particular place new shoots grew. Thus, they realize they could grow food. This led to farming and the first crops grown were wheat and barley.

G.K.:

Do page-34 in the book.

MUSIC:

Watch the video and practice the song.
