.....

.....

.....

.....

All our discoveries today are based on the ideas of men who lived before us; and without their groundwork, modern inventions would have been impossible.

Inventions Are Different from Discoveries

- A **discovery** is a product or process that already exists, but is unknown until someone discovers it.
- For example:
 - Rubber is a discovery
 - A tire is an invention
- Discoveries often lead to inventions, and vice versa.

Tuning In

1st Lines of Inquiry (LOI)-Discoveries in ancient time

Story of wheel watch this video-

Provocation-

Reflection Time

Day 4

**Investigate discoveries that took place in the past in different fields.
(Brainstorming)**

Activity:- Mystery Box Activity

The learners will segregate the words and pictures on the table mat. (These pictures are related to discoveries held in agriculture, clothing, time instrument, and wheel.)

Newton's Discovery

- Newton was sitting in his garden when he saw an apple fall from a tree.
- He decided that some force must be pulling the apple to the ground.
- He called it **gravity**.
