(Maths integration)

Day 1

My Timeline

Choose from here and mention the year of important events of your life in the Time-Line.		
		
I was born.	I started school.	I learned to ride bike.
My first birthday.	I started to walk.	

LOI 2-Changes due to discoveries

Read and reflect

The first **mechanical clock** in the world was invented in China in 725 A.D. Within 600 years, the technology had spread all the way to Europe, where the Prague astronomical clock was built - the oldest clock in the world that still runs!

The first **spectacles** were invented in Italy around 1286. No one knows who their inventor was, but those of us with glasses can be glad that they had the idea!

During the Medieval period, **gunpowder** was developed in China, where it was used first for weapons like bombs, rockets, and flamethrowers. It arrived in Europe sometime in the 13th century, and eventually came to be used for projectile weapons, like the medieval cannon above.

Which of these do you think has had the most impact on the world? Why?

Which one has had the most impact on your life? Why?

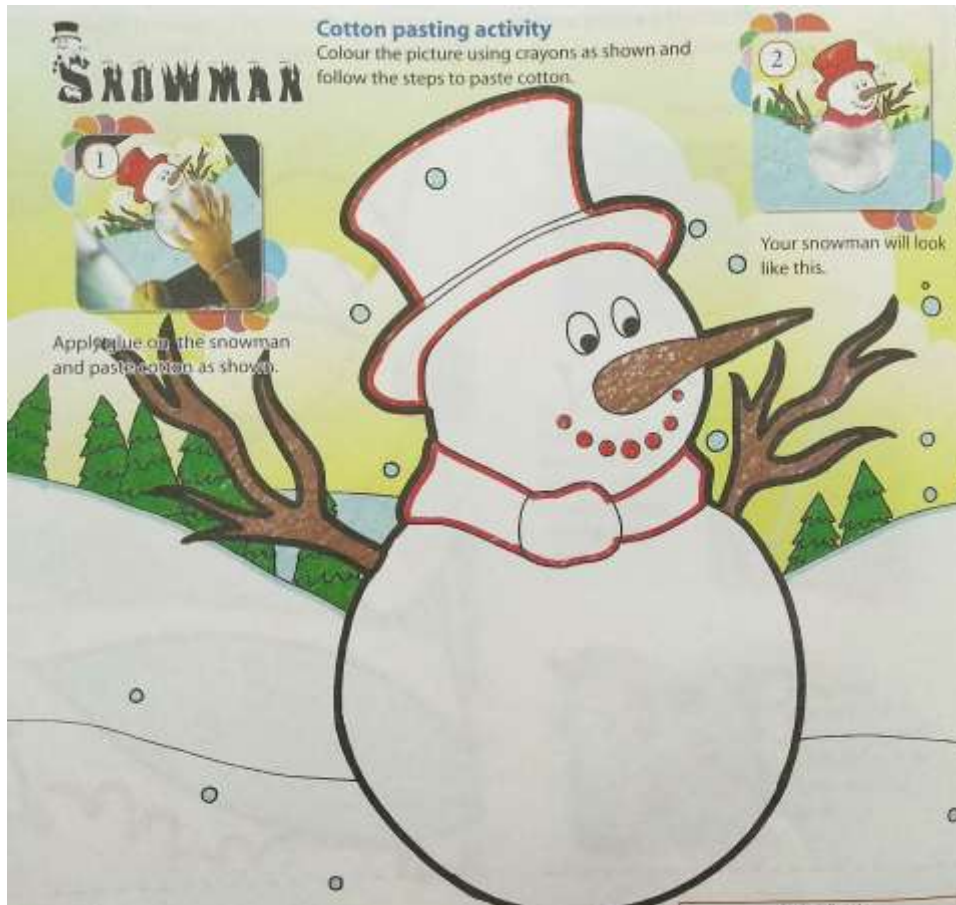

Share your perspective.

ART Task

Cotton pasting activity – Learners will colour the Snowman using colours of their choice and follow the steps to paste cotton.

Craft book page no 14.
