Watch the video about ways to save the landforms and read the reading sheet.  
Do the task given at the end of the reading sheet.

<https://youtu.be/KaXplamK01A>

### **Reading Sheet (only for reading)**

#### **Ways to save landforms**

##### **1. Afforestation should be promoted**

Afforestation is planting of trees where there were no trees previously. Afforestation is a very important agenda considering the benefits of that accrue to planting of trees. Methods that can be used to enhance afforestation are:

- Creating awareness among people, they should be taught benefits that come with having trees. The culture of protecting and planting trees should be cultivated in children.
- Tree planting day should be emphasized so that awareness to plant trees can be done.
- Regulation on cutting of trees should be done.

## 2. Littering should be controlled and stopped

Littering is any kind of trash thrown in small amount, especially in place where it doesn't belong. With time, it heaps up. It can be controlled by:

- Educating people to throw garbage in dustbin. Awareness should be created to throw dry garbage in blue dustbins and wet in green dustbins.

## 3. People should follow 3R's in life

The 3R's –Reduce, Reuse and Recycle, all help to cut down on the amount of waste we throw away. They conserve natural resources, landfill space and energy.

## 4. Awareness to save water and electricity

Energy conservation is very important to protect the environment. It can be done by:

- Turn off unnecessary lights, fans, AC (electrical and electronic appliances) when not in use.
- Try to use more and more natural light.
- Turn water off while shaving, brushing teeth, washing clothes etc.
- Take shorter showers or use buckets for bathing.

**TASK:** Write and draw pictures of any two ways to save landforms.

**ART:**

Draw and color mountain scenery with the help of reference picture given.
